

The Really Big Picture

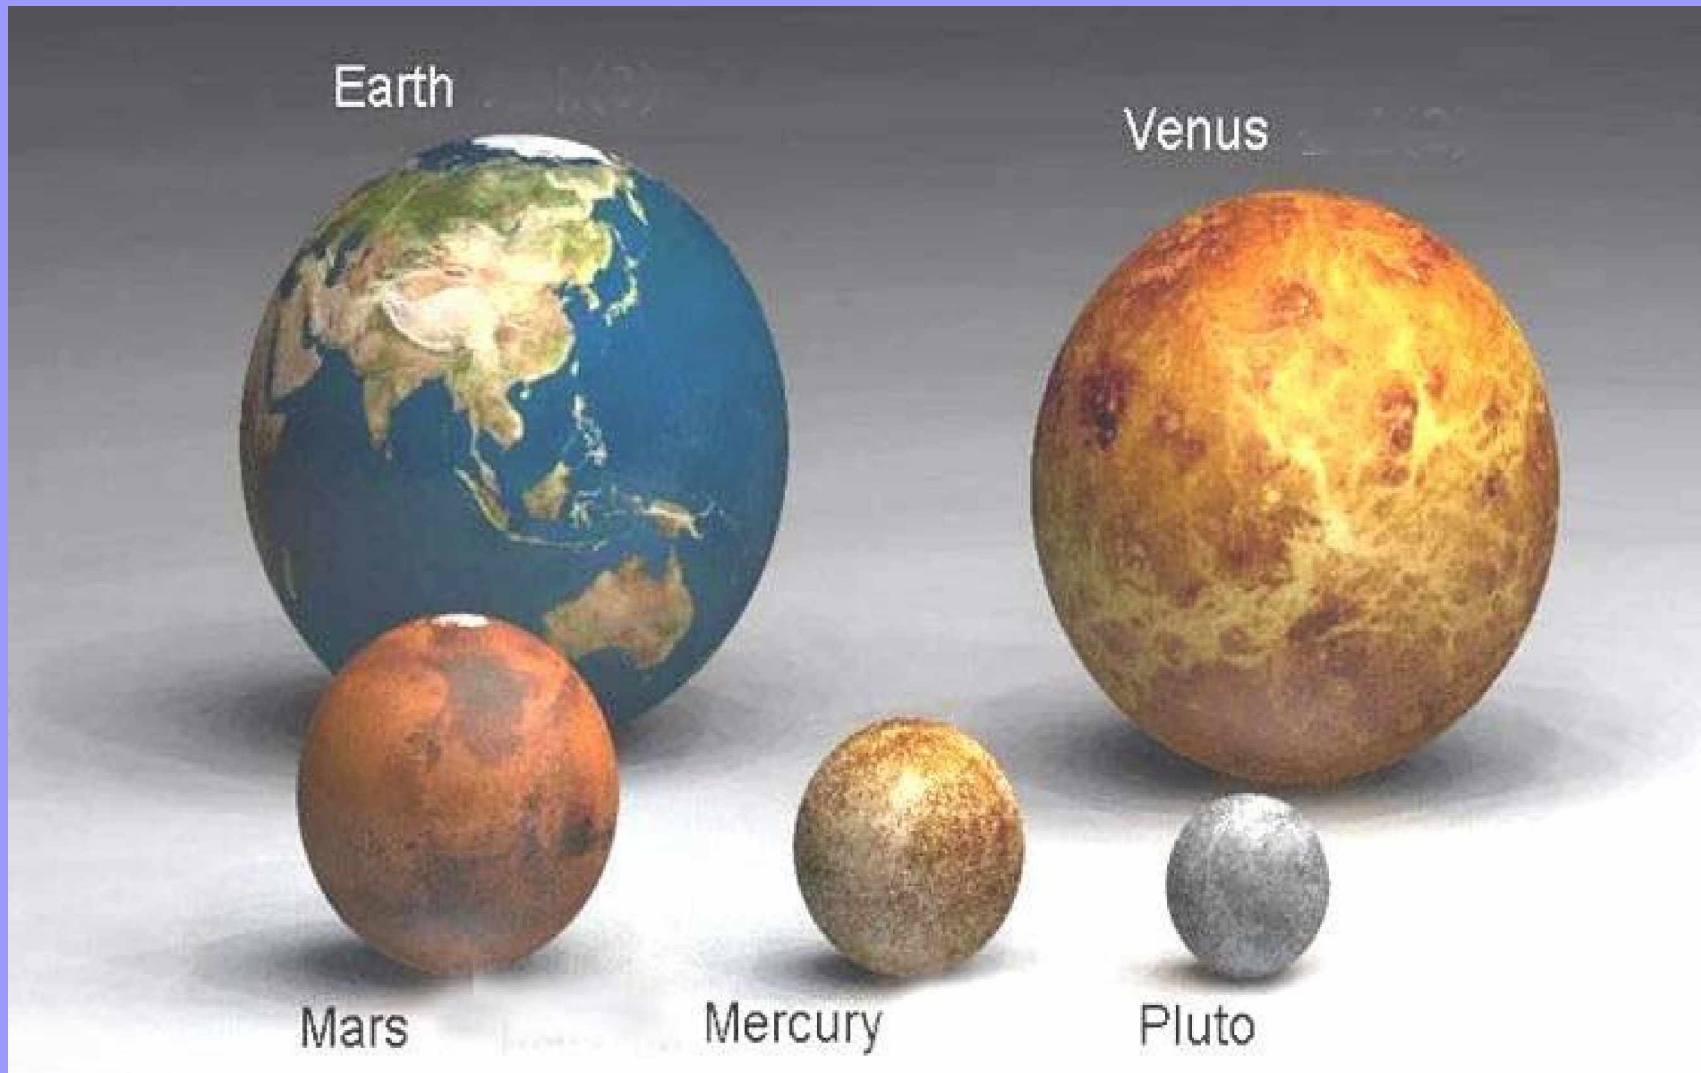

Jerry Scott
Sept, 2006

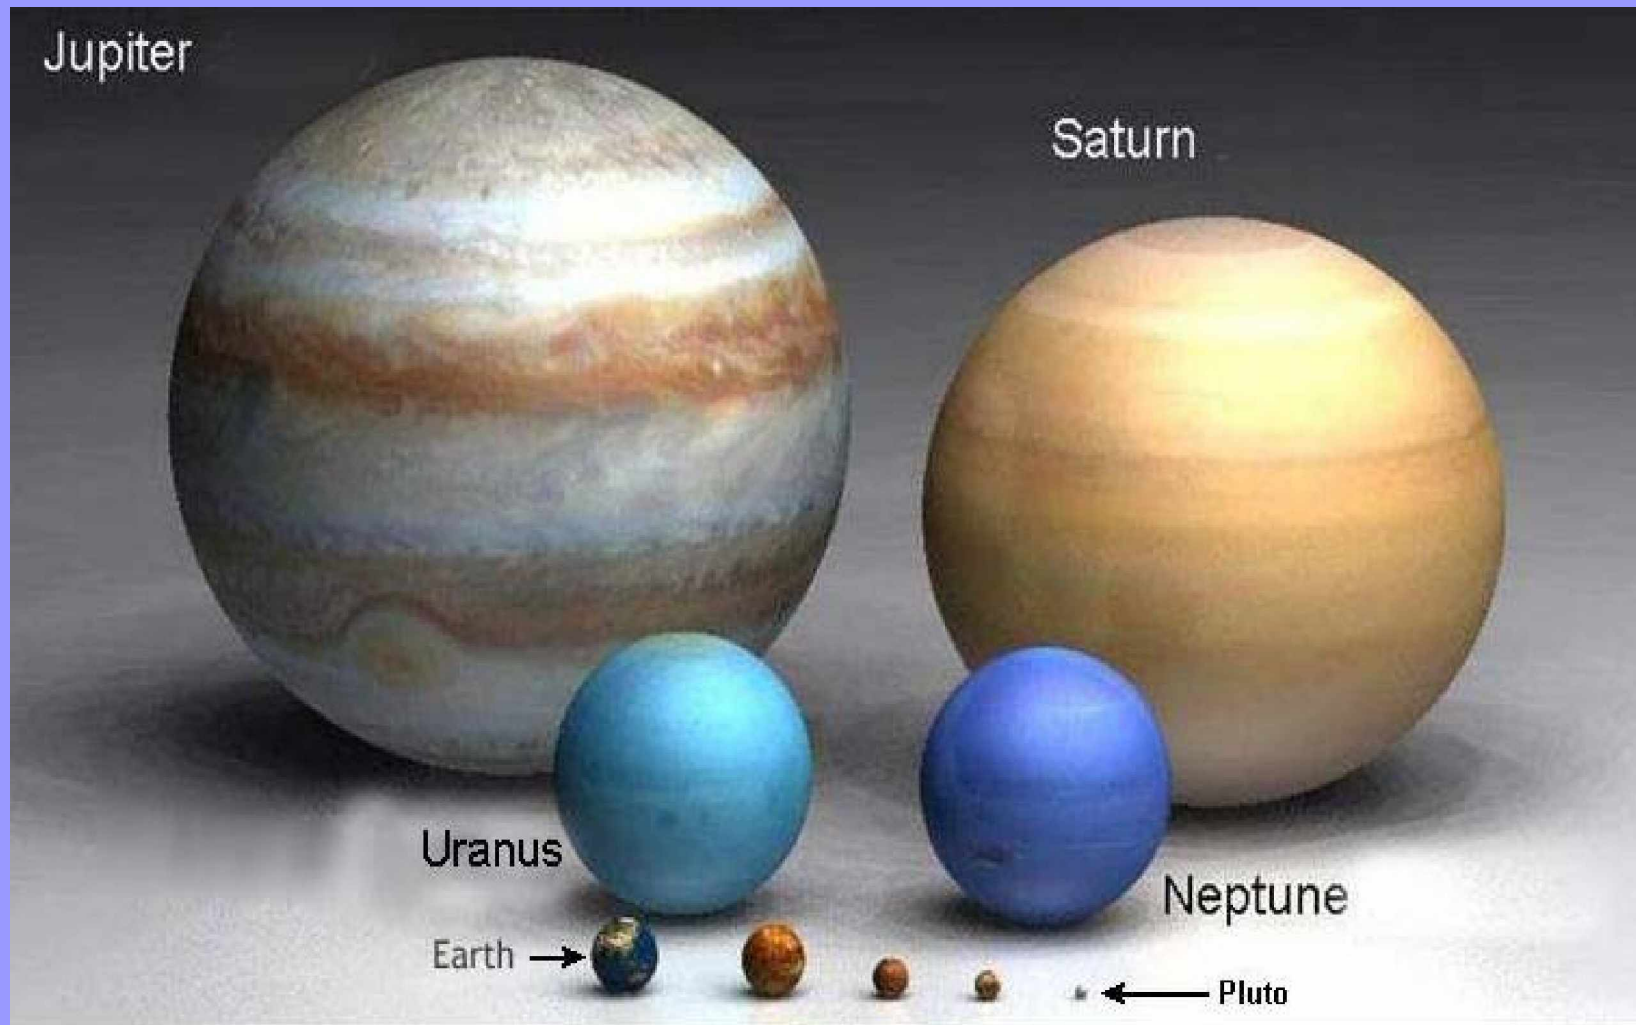

Have you Ever Wondered ...

- The following slides present our world in a very different size perspective.
- Sometimes when we have a truly elevated sense of how important we are, the big picture helps clear our minds.
- So get ready for the really big picture!!!

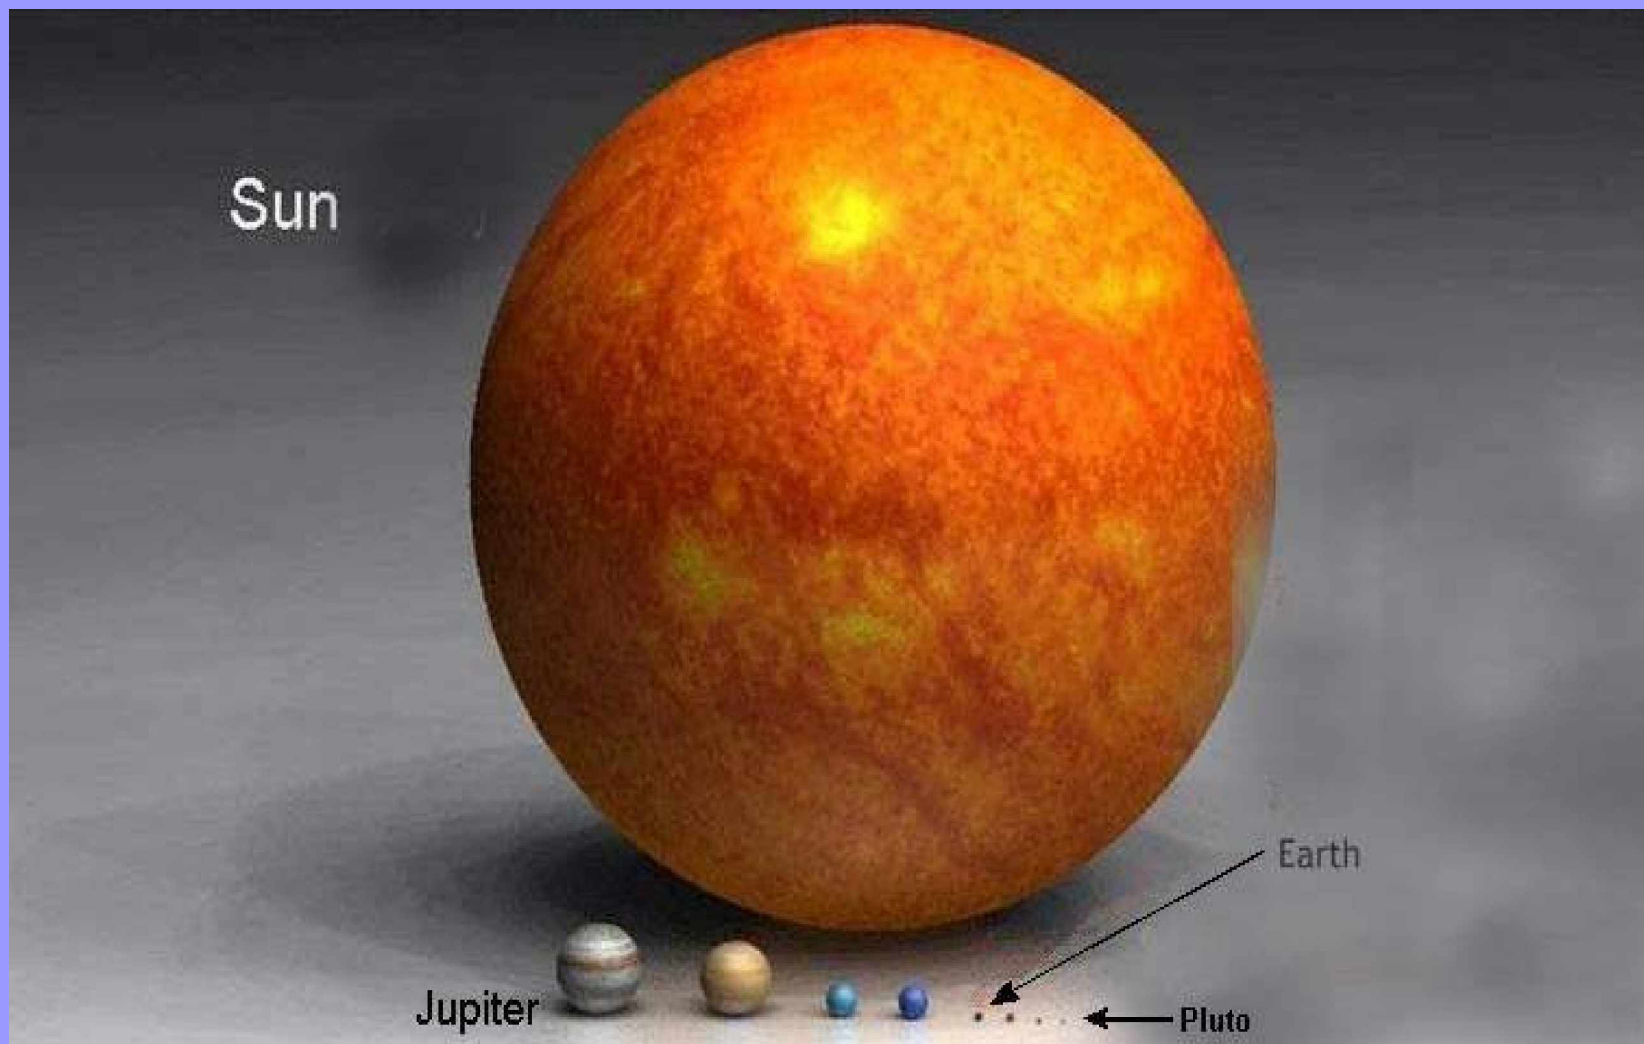

The Earth and Our Planets

Our Planets and Our Earth

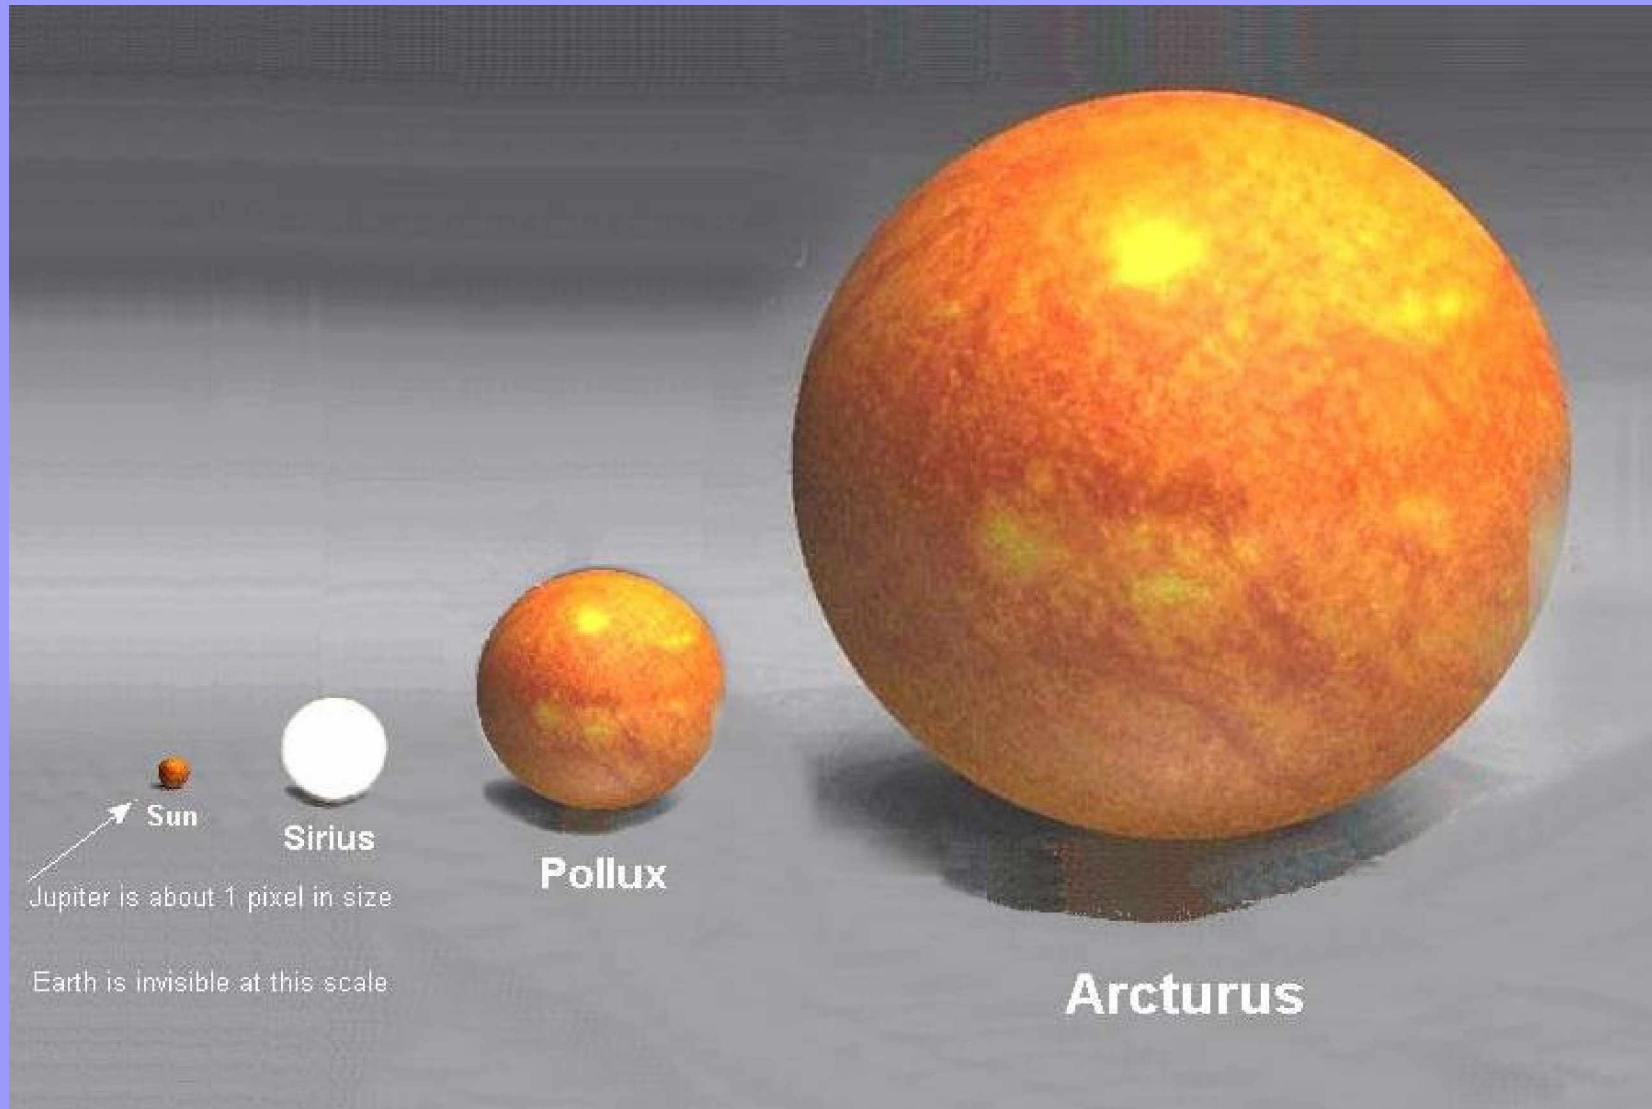

Our Sun to Pluto

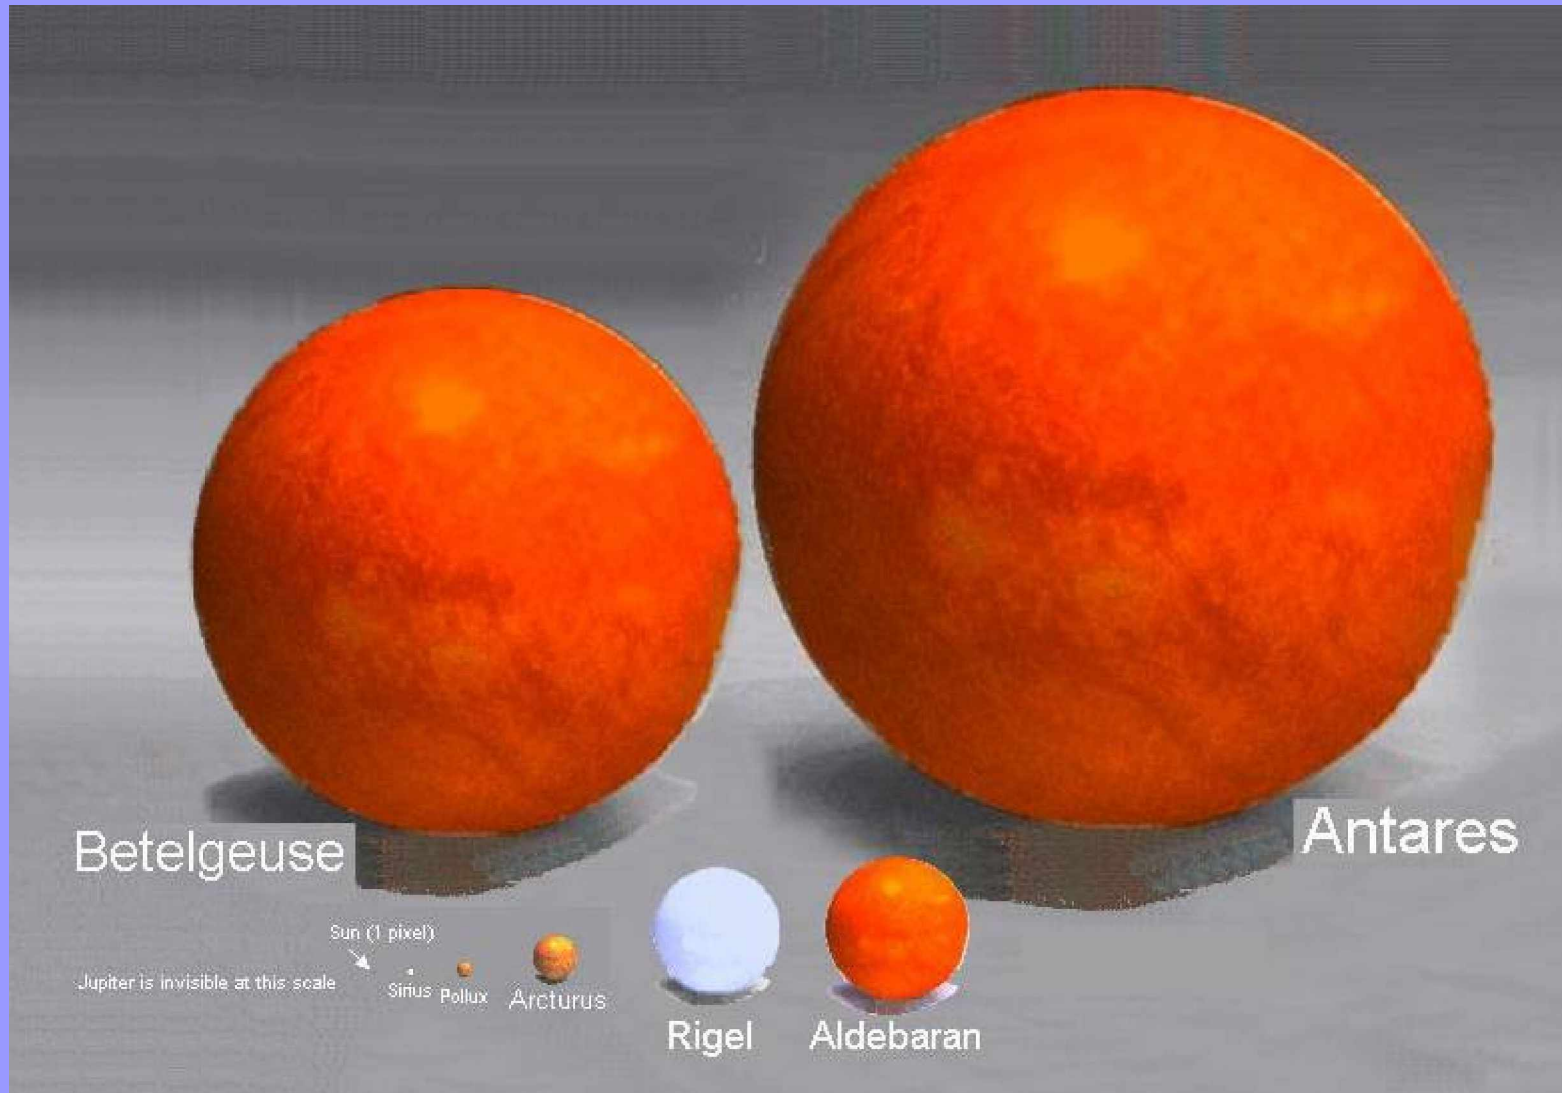

The Really Big Picture
Jerry Scott 2006

Our Sun to Star Arcturus

Arcturus to Antares to Our Sun

The Really Big Picture
Jerry Scott 2006

What Do We Do About It?

- **Antares is the 15th brightest star in the sky. It is more than 1000 light years away.**
- **When multiple Hollywood types were asked "What is the purpose of life?" many gave the usual answers, to party, do good, serve God, be humble, etc.**
- **What do you think? In looking at the slides, we are immediately struck by our small our whole world and planet system is, in the grand scheme of things.**
- **The universe humbles us, as it should. It is so vast it is not comprehensible by the human mind. It would be like an ant trying to understand the wonder of the internet. It can't be done.**
