

Note from Thomas Jerry Scott,  
5/19/2006:

According to Verisign's Web site, both PKCS #2 and PKCS #4 are no longer active and have been incorporated into the newer version of PKCS #1.

PKCS #2 is no longer active. PKCS #2 covered RSA encryption of message digests. It has been incorporated into the current PKCS #1.

PKCS #4 covered RSA key syntax.
