TCP/IP Network Troubleshooting Scenarios   J – Scott

Symptom	Possible Cause	Discovery Technique
Nobody on a given LAN segment can communicate with any other host.		
Host A can Telnet and Ping hosts on its LAN segment, but not other segments.		
Host A can ping Host B, but host B cannot ping Host A.		
Host A can Telnet to host B, but some FTP transfers with large files fail.		
Host A can Telnet to its default gateway and from the gateway, can Telnet to Host B, but cannot Telnet directly to Host B.
